

Software for a world in which people take center stage

The software solutions that have come together at myneva Group GmbH under the myneva brand umbrella are characterized by decades of experience, know-how and countless satisfied customers in the various sectors of the social services industry. The combined expertise of myneva results in sector-specific software packages that benefit all areas of an institution: from care or education to administration and management. myneva software solutions and digital tools offer more efficiency, networked workflows, better communication and more time for the people who need help.

Software for all areas of social services

- Elderly care
- Youth care
- Disabled care
- Social care services

Thanks to smart, intuitive software, our customers save time for their valuable work with people.

Software solution: the myneva Care Platform

myneva.care is a mobile solution that supports caregivers with documentation through voice recordings, allowing more time for client care.

myneva.connect is a mobile solution that reduces administrative tasks by efficiently processing frequent requests from clients and relatives and forwarding information to the right recipients.

myneva.analytics provides care organizations with comprehensive analyses of operational data, supporting data-driven decisions with standardized reports and forecasts.
